He also mentioned about the various plants and herbs which have medicinal values and these plants are consumed by tribal people from many centuries back.

Commercially valuable plants like bamboos, bats are found abundantly thus with proper awareness and skills these will generate livelihood and job opportunities for the unemployed.

On 18th September 2021 Arunachal Pradesh Science centre scheduled an online webinar on topic “inside the world of RED PANDA and opportunities in the field of wildlife and conservation” to celebrate the “international RED PANDA Day”:

Following were the resource person who graced the event and shared their experience and work on the field of saving and study of Red Panda

1. Aditya Anjuman (young professional, poverty and human development monitoring agency)
2. Chiging Pilia (Research Fellow, Nature Conservation Foundation)
3. Karnik priyansh (Senior Associate, Haqdarshak Empowerment Solution)
4. Tasso Rimung (Researcher and Conservation Educator)

Speakers of the events mainly focused on how we can Save Red panda from Extinction and what small things we can do as a human being.

YOU CAN CHOOSE ANYTHING...

climatically, geographically and because Arunachal Pradesh is majorly covered with vast forest, it IS believed to be best for survival of Red Panda;

Why is Arunachal Pradesh important for survival of Red Pandas ?

1. Red Pandas are endemic to the temperate forests of Eastern Himalayas in India.
2. Arunachal is presumed to hold the highest density of Red Pandas in India.
3. Why Arunachal - ?
 - Red Pandas lives in extremely unique habitats,
 - 61.39% of its geographical area are forests
 - Majority of areas are unexplored.

Hands on Activity on Assembling Solar Lamp Kit & LED Bulb:

The international day of scientific culture- IDSC- is being celebrated every year to highlight the importance of scientific culture in today's society, focusing on activities and institutions that provide ways for people to appreciate science as an important part of their lives.

With this vision and aim of IDSC the mentors of Arunachal Pradesh Science centre organised an outreach program at a remote village Toru under the Papumpare district of Arunachal Pradesh, focusing on the problems the people especially the students sector faces during the night time is constant electricity cut-off, so hands on activity on assembling the solar lamps and LED bulb was organised in which total 40 numbers of students participated. And total 30 numbers of students who stays at hostel and who always face shortage of electricity were provided with solar lamps.

Mentor explaining the working and parts of solar lamp
